Technical Program Manager / Engineering Manager with 15+ years of experience leading large-scale engineering programs, platform modernization, and cross-functional teams across FinTech, OSS/BSS, and product environments. Strong expertise in scalable system architecture, cloud engineering, microservices, AWS, DevOps, and full-stack technologies including Python, Ruby on Rails, Node.js, React, and Angular. Hands-on experience in Generative AI, AI Agent Development, LLM Integration, Conversational AI, workflow automation, and AI-powered enterprise solutions including HR Query Agents. Experienced in driving AI-enabled product delivery, stakeholder management, Agile execution, and engineering excellence to deliver scalable, business-driven outcomes.

Experience

Wissen Infotech • Bangalore

Apr 2025 - Present

Technical Program Manager

- Built an AI-driven HR Support Agent for intelligent handling of employee queries related to HR policies, attendance, leave management, payroll, benefits, onboarding, and workflow automation.
- Delivered 3 parallel programs impacting multiple business units with on-time and within-budget execution and Led cross-functional teams (23+ members) across engineering, QA, and DevOps and Defined program roadmap, tracked KPIs, and improved delivery predictability by 20%
- Drove stakeholder alignment across business and tech, reducing dependency delays by 30% and Coordinated with leadership and client teams to track KPIs, resolve dependencies, and ensure seamless releases.

Idexcel Technologies Pvt. Ltd. • Bengaluru

Jan 2023 - May 2024

Technical Lead/Manager

- Led a team of 28, including DevOps, in a FinTech product company, driving the development of an asset-based lending platform.
- Implemented scalable architectures that supported a 30% increase in transaction volume within six months and Improved system scalability and reliability, handling a 5x increase in traffic without downtime.
- Architected and optimized high-traffic systems, reducing cloud costs by 25% through efficient resource allocation and Reduced deployment time by 25% through the optimization of CI/CD pipelines.

Fountain & TringApps Research Labs Pvt. Ltd.

Jun 2021 - Jun 2022

Team Lead

- Led a team of 18 for a Corporate Job Portal Product Company, focusing on hiring applications for hourly workers.
- Improved application performance by 20% through code optimization and database tuning.

GuideHouse India Pvt Ltd

Feb 2020 - May 2021

Project Lead

- Led a team of 12 for a FinTech Product, developing the RevApp for insurance, hospital, and bank communication.
- Improved system reliability by 35% by implementing robust error handling and monitoring solutions and Migrated legacy monolith to microservices, achieving 40% faster data retrieval and reduced downtime.

Goomo Holdings

Aug 2019 - Jan 2020

Flight Team Lead

- Led a team of 10 for a Flight Online Booking Product Company, focusing on the online ticket booking system.
- Increased booking efficiency by 20% through the optimization of the booking process.

Webnish Software Pvt Ltd

Apr 2018 - Aug 2019

Senior Tech Lead

- Led a team of 22 for an Online Media and Website Builder Product Company and Improved code quality by 30% by implementing code review processes and coding standards. Improved server architecture, reducing infrastructure costs by 20%.

Accion Labs India LLB

Mar 2017 - Apr 2018

Principal Software Engineer

- Contributed to projects for OwlInvest, 1docWay, and MCAProtect.

AMP e-Technologies

Dec 2015 - Feb 2017

Senior Software Engineer

- Worked on University Halo and AMP (Asset Management Platform) projects.

Srishti & Kreatio Software Pvt Ltd

Jan 2011 - Dec 2015

Software Engineer

- Contributed to CMS and Health care projects.

Notable Achievements

✔ Led cross-functional teams of up to 28 members, driving Agile transformations and improving delivery efficiency.

✔ Migrated legacy monolith to microservices, achieving 40% faster data retrieval and reduced downtime.

✔ Improved system efficiency by 40%, reduced latency by 60%, and optimized infrastructure costs by 30% through performance tuning initiatives.

✔ Architected scalable architectures supporting a 30% increase in transaction volume and handling a 5x traffic increase without downtime.

✔ Developed and deployed an AI HR Agent to streamline recruitment processes and automate employee inquiries.

Projects

AI-Powered HR Query Agent

- Designed an AI-powered conversational HR assistant for employee HR-related queries and enterprise self-service automation.
- Implemented contextual HR policy assistance, leave/payroll guidance, onboarding support, and workflow automation using LLM-based conversational AI.
- Improved employee support efficiency through intelligent query handling and reduced manual HR operations.

Skills

Intelligent Knowledge Systems

Natural Language Processing

Cross Team Collaboration

Prompt Engineering

Stakeholder Management

AI Workflow Automation

AWS

Git

Education

Anna University, PET Engineering College2010

Bachelor of Engineering in Computer Science and Engineering

Graduated with 65%.

Accomplishments & Involvements

Certifications

- **AWS Certified Solutions Architect** - Amazon Web Services
- **AI in Project Management** - Linkedin Learning
- **The Basics of Scrum**
- **Introduction Basics of Disciplined Agile**
- **Certificate Of Completion Become an AI Powered Product Manager**
- **Project Management course**

Awards

- **Dhronacharya Award** - Webnish Software
- **Team Leader Excellence Award** - AMP e-Technologies
